SPILLS:

Name: KINGSBOROUGH COMMUNITY
Address: COLLEGE
City,State,Zip: BROOKLYN, NY
Spill Number/Closed Date: 0109966 / 2011-03-17
Facility ID: 0109966
Facility Type: ER
DER Facility ID: 112251
Site ID: 130271
DEC Region: 2
Spill Cause: Unknown
Spill Class: B3
SWIS: 2401
Spill Date: 2002-01-15
Investigator: RVKETANI
Referred To: Not reported
Reported to Dept: 2002-01-16
CID: 205
Water Affected: Not reported
Spill Source: Unknown
Spill Notifier: Responsible Party
Cleanup Ceased: Not reported
Cleanup Meets Std: False
Last Inspection: Not reported
Recommended Penalty: False
UST Trust: False
Remediation Phase: 0
Date Entered In Computer: 2002-01-16
Spill Record Last Update: 2011-03-17
Spiller Name: BOB KANAPORTH
Spiller Company: KINGSBOROUGH COMMUNITY COLLEGE
Spiller Address: 2001 ORIENTAL BLVD
Spiller Company: 999
Contact Name: CALLER
DEC Memo: "Prior to Sept, 2004 data translation this spill Lead_DEC Field was SAWYER 11/17/2003-Vought-File review by Vought: Site visit on 1/16/02 in response to spill #0109943 from anonymous caller. Vought observed large spill originating from two (275-gallon) #2 fuel oil USTs. Spill unknown to site construction manager and located under mobil platform. Vought spoke to Kevin Johnson and DEC required: 1)Endpoint soil samples 2)Groundwater sample if gw encountered in soil excavation 3)disposal manifests. 1/17/02-Vought-Spoke with Richard Wetherbee (Louis Berger 212-363-4223x36) and repeated above requirements. Wetherbee stated that report will be received by DEC by 2/17/02. 2/20/02-Vought-Site visit by Vought during excavation of contaminated soil. 6-10' area along ramp showing staining. Additional soil excavation will be performed and endpoint sample collection. 3/1/02-Vought spoke with Wetherbee who will send report to DEC. 11/17/2003-Vought-Call Richard and left message to return call to DEC with report status. 1/5/04-Vought-Spill transferred from Vought to Austin. 1/27/04 - Sawyer - Spill transferred from Austin to Sawyer. 03/29/06 Recommended next: contact Richard Wetherbee to find out status of report. Austin - 9/30/09 - Spill project assignment transferred from Albany staff(DJEATON) to Vought, for further review

and action. - end 6/11/10-Vought-Spill transferred from DEC Vought to DEC Ketani as per DEC Austin and Vought transfer to Section A. 7/16/10 - Raphael Ketani. The PBS case is #2-062588. There are dozens of tanks. Most of the tanks contain diesel fuel. About 5 tanks contain #6 oil. One tank has gasoline. I tried calling Mr. Wetherbee, but the operator told me that he didn't work there anymore. I tried calling Bob Kanaporthi at Kingsborough Community College (718) 472-8620, but could only leave a message. 7/19/10 - Raphael Ketani. Mr. Kanaporthi called me back. He said that he works for the DDC. He said that they were involved in constructing a school addition on the campus. He will look for documentation regarding the cleanup of the spill. 8/3/10 - Raphael Ketani. I spoke to Anne Charlap of the SCA IEH Division (718) 752-5384. She said that the soil cleanup reports are in the archives at SCA. She will dig them out and send them to me via e-mail. 11/22/10 - Raphael Ketani. I tried to contact Ms. Charlap, but I found out that she no longer worked for the SCA. I was transferred to Anna Ciecierska (ch-cher-ska), her supervisor, at (718) 752-5028. Ms. Ciecierska said that she will look for the documentation regarding the cleanup. 11/24/10 - Raphael Ketani. Matt Gallow of LiRo [cell (516) 404-5611] called me up. He said that he is now the case manager for the project. He has found the first half of the 2002 report and he is looking for the second half. As soon as he has the whole report, he will send it to me. 1/31/11 - Raphael Ketani. I tried to contact Mr. Gallow, but I could only send an e-mail to smgllc@yahoo.com. The e-mail asked whether he had found the second part of the 2002 report and to send it to the DEC. 2/18/11 - Raphael Ketani. I tried to contact Ms. Ciecierska (ch-cher-ska) (718) 752-5028 regarding receiving both parts of the site investigation/remediation report, but I could only leave a message. Next, I called the SCA and spoke to Alex Lumberg. He said that he will talk to Lee Gutterman of the SCA and have her get back to me regarding the project. Lee Gutterman (718) 472-8502 of SCA called me. She asked what I needed. I told her that I was looking for the 2002 investigation and remediation report for a spill on the campus of Kingsborough Community College. I told Ms. Gutterman that I had previously contacted Mr. Gallow and Ms. Ciecierska for the report. She said that these people no longer work at the SCA. She said that I should give her a little time and she will find the report and send it to me. 2/22/11 - Raphael Ketani. Ms. Gutterman called. She said that the SCA didn't have a copy of the investigation and remediation report. She had contacted Louis Berger and they have begun to look through their archives for the report. 3/3/11 - Raphael Ketani. Ms. Gutterman (718) 472-8502 called and left a message. She said that Louis Berger searched for the investigation and remediation documents, but they had only incomplete documents on their discs. They will go to their warehouse and dig out the full documents. 3/14/11 - Raphael Ketani. I spoke to Drew Pardis cell (646) 577-8280 regarding the site. He said that they had found the investigation and remediation report. He will send it to the DEC this week. 3/15/11 - Raphael Ketani. Mr. Pardis hand delivered a package of documents. The package contained the 1/28/02 Louis Berger Group Post Excavation Soil Sample Analytical Results report and the 3/4/02 Louis Berger Group Post Excavation Soil Sample Analytical Results report. I reviewed the reports. Even though groundwater was mentioned as being at 4 feet below grade (the site sits on a partially manmade peninsula that juts out into Jamaica Bay), no groundwater was encountered while conducting the excavation. According to the data in the 3/4/02 report, end point samples were taken on 2/20/02. They were entirely non-detect for VOCs and almost entirely non-detect for SVOCs. The

Remarks:

small number of SVOC hits were low in concentration and suggested the presence of historical fill. Based upon the data in both post-excavation reports, I have determined that the contamination has been removed and that the spill does not pose a risk to the environment or the public. Therefore, I am closing the spill case."
"contaminated soil encountered on const site of new school."
